ABOUT ME

With 3 years of front-end development experience, I focus on crafting intuitive, seamless, and accessible interfaces. I thrive in collaborative environments, tackling complex challenges with elegant solutions, and I'm passionate about staying ahead of the curve with the latest web standards.

EDUCATION

2023
Bangladesh University
Bachelor of Science in CSE

2018-2022
Rangpur Polytechnic Institute
Diploma in Computer Technology
Result- CGPA 3.84

SKILLS

EXPERIENCE

PointerFlow

Lead Frontend Developer | 2023-Present

I lead a front-end team, handling Shopify store design, custom features, business support, and app integration. I also work on our internal products, building fast, scalable front-ends using Remix.js, Polaris, and GraphQL, while implementing core business logic and solving technical challenges.

Key Projects:

- **StoreCraft** – A section library app for Shopify, enabling merchants to build flexible store layouts without code.
- **Lightnr Swatch** – A super-fast product swatch app built with Preact, optimized for variant switching and smooth UX.

AnalysisACE

Front-end Developer | 2021-2023

At AnalysisAce, I focused on turning Figma designs into clean, responsive, and scalable web interfaces using Next.js, TypeScript, Tailwind CSS, and Material UI. I helped build key products with strong front-end architecture and smooth user experiences.

Key Projects:

- **DiagnosticAce** – A medical data analysis tool designed for efficient healthcare data processing.
- **BestFluency** – An e-learning platform focused on language and communication skill development.
- **All In One Business** – A business directory and marketing support platform to help clients grow and manage their businesses.
